-

App Development and Sales Expertise:

- Spearheaded the development and distribution of self-created apps in the Atlassian Marketplace since 2012.
- Streamlined app installation through cloud-based deployment or fully functional cloud-based applications.

- Ensured app security in compliance with Atlassian Pty Ltd's stringent requirements.
 - Configured SSL certificates with A to A+ security ratings.
 - Configured Postfix/Courier/ClamAV/SpamAssassin for AI-based anti-spam in Ubuntu Server 20.04 LTS with MySQL/PostgreSQL databases.
-

Software Security Expertise:

- Extensive knowledge in software security, proficiently identifying and addressing vulnerabilities, including SQL injection and code inclusion.

Technical Proficiency:

- Proficient in working with Amazon Web Services (AWS), optimizing server usage to manage expenses effectively.
-

Key Achievements:

- Played a pivotal role in planning the UML/ERD modelling tool for Siemens Polarion ALM software in 2010-2011.
 - [Official proof of involvement](#)
-

Projects and Work Samples:

- 1. i4ware ChatGPT OpenAI Chat with Dark Theme**
 - Made new look and feel for Atlassian Confluence.
 - Technologies: CSS, jQuery, JavaScript, Java EE, Velocity, Confluence Java API, Jenkins, React
 - More details: [Marketplace link](#)
- 2. Infinite Scrolling Photobrowser App**
 - Developed a React App using JSONPlaceholder sample database.
 - Public demo: [Infinite Scrolling Photobrowser](#)
 - [Source Code](#)
- 3. Photobrowser App**
 - Created a React App using JSONPlaceholder sample database.
 - Public demo: [Photobrowser](#)
 - [Source Code](#)
- 4. 3D Model Viewer**
 - Created with ReactJS and THREE libraries to view 3D Models in STL file format.
 - Public demo: [3D Model Viewer](#)
 - [Source Code](#)
- 5. Users and Their Details App**
 - Developed an app using React and JSONPlaceholder public sample database.
 - Public demo: [Integrify Pre-Task App](#)

- [Source Code](#)
 - 6. **i4ware - SDK**
 - Contributed to a MIT licensed SDK for customized ERP systems and software development.
 - Technologies: React, React Bootstrap, MySQL, PostgreSQL, Laravel, PHP
 - Public demo: [SaaS Demo](#)
 - [Source Code](#)
 - 7. **i4ware AI Assistant Real-Time Chat**
 - Powered by ChatGPT-4, built with Laravel 9 and React 18.
 - Admin panel demo: [i4ware AI Assistant Real-Time Chat Admin](#)
 - Public AI chat demo without login: [i4ware AI Chat](#)
 - [Source Code](#)
 - 8. **Automated AI Email Response Software**
 - ChatGPT 4o-mini OpenAI based email responses for companies who try to sell you some services gets “Thanks but no thanks!” message and AI can automatically reply to those who asking services from email receiver with quote “Yes, we can do it. Can you give more details?”. Technology stack is Python, Courier, Postfix, Ubuntu Server 20.04 LTS, MySQL, SpamAssassin, Abusix, DNS, IMAP, and ChatGPT 4o-mini OpenAI.
 - 9. Source Code: https://github.com/foghorn-hash/openai_email_responder
 - 10. **Requirements Diagramming**
 - Contributed to ER/UML diagramming tool for Polarion ALM.
 - Technologies: Gliffy REST API, Polarion SDK, JSP, Java EE, Java Servlet, Ext JS, REST
